

Farm Bureau of Michigan Selects Rockport Solution's Versara Platform to Manage Their Commercial Mortgage Portfolio

February 2018

Rockport Solutions is very happy to add Farm Bureau of Michigan (FBM) to our family of users of the Versara Commercial Mortgage Loan Accounting, Servicing, and Portfolio Management platform. "We have known the staff at FBM for 20 years and always found them to be very knowledgeable, a great client and partner", stated Joe Daddario, President of Rockport Solutions LLC.

Pamela Peters, head of Mortgage Loan Administration, for FBM said "We chose Versara over other products because we felt it was the best fit for our company. We needed a commercial mortgage software product that could handle many different deal structures and provide the capability for custom reporting. In a nut shell Versara stood out for two main reasons...The software provides what we need and the people behind it have a high level of knowledge in the industry and a proven track record of responsive support".

About Rockport Solutions:

The Rockport Solutions team has over 100 years of Commercial Mortgage experience in software development, accounting & servicing, portfolio management, and loan origination. Rockport Solutions' product Versara is the most versatile accounting and portfolio management system available to commercial mortgage investors. Versara addresses today's complex issues with multiple investors, notes, properties, accounting basis tracking and regulatory reporting.
